

I'd like to comment on docket 02-278. I was an early subscriber to the Indiana no call list. We used to get so many solicitation calls in the evening that we would take the phone off the hook until 9 PM. This would allow us to have dinner and an evening undisturbed by unwanted phone calls, but would keep us from receiving any emergency calls from family or friends. Since signing up for the plan we have only received a couple of unwanted calls.

I would ask that you please do not take any actions to lessen the effectiveness of the Indiana law. In fact it would be even better if the federal law was strengthened so it was as strong as Indiana's law.
